LEAD AND COPPER TESTING

The Board Members would like to thank everyone who was asked to participate in the lead and copper testing recently that is completed every three (3) years per the PA Department of Environmental Protection's requirements. Your cooperation is greatly appreciated.

VENTS & HYDRANTS

It's that time of year, even though the recent temperatures don't feel like it, when we ask each of our customers to remove the snow when it is blocking sewer vents or fire hydrants. We thank you for your cooperation in this matter.

OUTDOOR FAUCETS

The Authority would like to remind everyone to check their outdoor faucets. Freezing temperatures can cause your outdoor faucet to freeze and break causing water loss. Other things that can happen if it is not caught would be cloudy water and reduced pressure along the system for our other customers. Please make sure all outdoor faucets have been winterized.

SEWER SYSTEM PROHIBITED WASTES

With winter soon upon us again, please have your HVAC technician inspect your oil tanks for any problems. Home heating fuel is a prohibited waste for the Authority's wastewater system. The homeowner will be held liable for any and all damages pertaining to the clean-up and restart of the plant should their home heating system malfunction causing home heating fuel to be discharged into the wastewater system. Rules and Regulations concerning the discharge of prohibited wastes and unlawful connections may be viewed through the Authority website LMTMA.COM.

DAMAGE

Please contact the Authority Office immediately at 570-758-3615 if you discover that damage has occurred on either the water or wastewater system so that the proper repairs can be scheduled. The Authority would like to say thanks to those people who have taken the time to report damage and/or leaks. It is greatly appreciated.

Customer Service is Our #1 Priority
